GIROFLEX ADAPT 24H ARMCHAIR

The hardworking ones. Whether in control rooms, at police stations, call centres, airports or casinos: wherever people work 24 hours a day and 7 days of the week, the 24H Armchair by Giroflex cuts a good figure and does its job in a reliable and confident way. Even under difficult conditions where several people share a workplace during round-the-clock operations.

With this constant strain, it is important that the work armchairs are robust. So the 24H Armchairs by Giroflex are especially reinforced. All models have an ergonomic design. They promote well-being,

support and relieve the musculoskeletal system and can be individually adjusted in just a few simple steps. There is a choice of “Strong” fabric or leather for the cover. Developed by Giroflex, the “Strong” fabric has climatex properties that balance the room and body temperature. Either way, the armchairs are perfectly prepared for successful continuous service at any time.
